CV Moriz Büsing

Work Experience

Since leaving N26 in 2020, I am working on various projects from small websites to big platforms as a freelancer. Below I picked some projects I worked on during that time.

Idagio (since 2021, freelance)

Idagio is a music streaming platform specialised in classical music. I work on converting legacy React components, integrating the web app into the Android application via capacitor and various design improvements.

Focus: UX, Conversion, Rapid Development, Commerce

Stack: React, Electron, Redux, Capacitor, Heroku

Happy Plates (2020–2022, freelance)

Happyplates.com is a highly conversion oriented food-tech platform integrating with external partners. Architected and implemented the Next.js application with a small team of developers. Built a cart system, a design system, set up an end-to-end testing suite and optimized the app for performance and bundle size.

Focus: UX, Conversion, Rapid Development, Commerce

Stack: Typescript, React, Next, Tailwind, Firebase, Cypress, Vercel

Portrait (since 2020, freelance)

Rewrote and re-architected this enterprise data processing application from the ground in TypeScript, React and Next.js. Since then I have been working on features, setting up testing systems, implementing UI components and maintaining the application, as well as designing API interfaces and pipelines.

Focus: Architecture, Interfaces, UI Development

Stack: Typescript, React, Next, radix-ui, Cypress

N26 (2020–2021, employed)

Worked on the React-based web app for german fintech unicorn N26 in a team of 20 Web Engineers. Mentored junior engineers, architected and released features, improved the release and testing processes and helped build the design system.

Focus: Accessibility, Testing, Reliability, Security

Stack: React, GraphQL, Apollo, Fela, Cypress, Jest, Jenkins

wild (2016–2019, employed)

Started out as a developer, later lead the tech team of 6 engineers to realize web based projects for clients such as Google, Spotify, Samsung, Red Bull. Hired and mentored engineers, planned and executed projects from cutting edge microsites to platforms with heavy traffic. Developed one of the first sites using the WebVR API, used WebGL and the Web Audio API extensively in many projects.

Focus: Animation, Performance, Experimental technologies

Stack: React, Next, Styled JSX, SASS, AWS, Three.js, Tone.js

identum (2015–2016, employed)

Built many websites, most based on Drupal.

Focus: Advertising, Basics

Stack: Drupal, JavaScript, Gulp, PHP

Based in Vienna, Austria

Education

University of Vienna (2012–2015)

Computer Science with media focus (Medieninformatik)

Freie Universität Berlin (2011–2012)

Computer Science

Secondary Skills

- API Design
- Relational Databases
- Command Line / UNIX
- Github Actions
- AWS
- Various CMS'es
- Music Production
- Adobe Creative Suite

Other Interests

Music, Chess, Cycling, Food, Travelling
